

C# .NET Software Developer – Downtown Denver (LoDo)

DevIQ is a custom software development company based in downtown Denver, CO. Our focus is on developing the very best mobile and web applications, and building long-term relationships with our clients. We are currently looking for a Full-Stack C# .NET programmer to add to our growing team.

At any point-in-time, we have a “portfolio” of active projects on which we are working. This provides the chance for our team members to learn new technologies, experience new industries, and diversify their development opportunities.

Ideal candidates will have the following qualifications:

- Several years of experience creating web/enterprise applications using the C#/ASP.NET/MVC/SQL Server tool sets
- Experience with Javascript and HTML
- Strong experience in a professional services or other external setting in which projects must fit within client-based parameters that include a budget and timeline in addition to milestones and quality
- An understanding of what it means to wear different hats in a small, dynamic team environment, and a willingness to jump in and help wherever needed
- Practical experience working in an agile development environment, with an understanding of what works and what doesn't in a professional-services setting

Familiar with/interested in:

- React, AngularJS, Vue.js, JQuery, etc.
- WebAPI or RESTful APIs
- Entity Framework, Dapper, etc.
- XAML, WCF
- Azure, GCP, AWS

We enjoy what we do, we value balance in our lives, and we take pride in our work. As a small company, you have an opportunity to have a direct impact on our clients and our business on a daily basis. If you would like to explore opportunities with us, please email a cover letter that outlines your interest and compensation expectations along with your resume.
